

CHARACTERISTICS

Delivering a warm, halogen-like accent beam, the Dim-to-Warm LED spot is perfect for all spotlighting applications. Having the familiar look of, and direct fixture compatibility with traditional halogen spots – either MR16 or GU10 – the classic beauty of glass spots is preserved, but at dramatically improved energy use. Suitable for use with all industry-standard dimming protocols.

TECHNICAL SPECIFICATION

- 5 Watts replaces 50W halogen
- Mains Dimmable
- 220-240V input voltage
- 25,000 hour life
- Excellent CRI of 95+
- Beam angles 10°; 25° & 36°
- Warm White Dims Warmer (2700 -2200°K)
- Fully Certified to CSL
- 345 Lumen output
- Full 3-Year Warranty
